FOR IMMEDIATE RELEASE

Inscape's Award Winning Planna System is a Stylish and Cost Effective Option for the Private Office

Holland Landing, Ontario, June 8, 2010 – Inscape Corporation, a leading designer, manufacturer and distributor of innovative workplace solutions, announced that its Planna desking system will be showcased at NeoCon® World's Trade Fair 2010 in Chicago, June 14-16, 2010. With new power and data capability, Planna delivers an enhanced level of form and function as a cost effective private office solution with a contemporary aesthetic.

While traditional casegoods position storage behind the user in a credenza, Planna offers a unique approach – side credenza planning. The challenge of this configuration was in determining how to support technology while keeping wires and cables out of site. “We developed three different designs before settling on one that would be in keeping with Planna’s small kit of parts and its mid-market price category”, said Sharad Mathur, Vice President of Marketing. “Our final version of technology management had to address the functional needs of the private office without detracting from Planna’s clean, crisp aesthetics and we’ve achieved this with a simple and very effective solution”. A hinged front compartment conceals a cable management drawer and provides easy access to wall services. Cables are neatly routed from the worksurface through a flush mount grommet. Electrical bookcase combines binder storage with electrical and data cable management.

Offering a high end and minimalist aesthetic, Planna is a highly functional option for private offices. It is a cost effective solution that provides savings of 30% or more when compared to traditional casegoods. With 1.5” interior incremental adjustability and off-modular capability, Planna provides flexibility to meet various planning requirements and enables easy reconfiguration. Planna’s other applications include open plan, desking, benching, reception and collaborative work areas so achieving a consistent aesthetic throughout an office is easy with this flexible and adaptable product.

Planna is built with high recycled steel content which is 100% recyclable and FSC-certified MDF or wood veneer worksurfaces. It is built under one roof to reduce impact on the environment and is GREENGUARD certified. Since being launched in 2008 Planna has been recognized with multiple design awards including, Best of NeoCon Silver, GOOD DESIGN, Best of Canada, Design Exchange and Interior Design Magazine’s Best of Year Product.

Visit Inscape's showroom during NeoCon, Suite 1095 at the Merchandise Mart to experience Planna and Inscape's other award winning and integrated product solutions.
