Inscape's ADDWALL Brings Enhanced Aesthetics and Choice to Our Highly Reconfigurable, Performance Proven Movable Wall Solutions

Holland Landing, Ontario, June 10, 2010 – Inscape Corporation, a leading designer, manufacturer and distributor of innovative workplace solutions, announces the launch of ADDWALL, a scalable movable wall solution offering superior aesthetics. Its additive features and finish options enable companies to select only the features needed to meet their requirements.

ADDWALL has been designed to eliminate the complexity associated with specifying movable walls. By seamlessly integrating scalable functionality and aesthetics into a single wall, ADDWALL panels can be specified in numerous paint, fabric, glass, laminate and wood veneer options along with an array of material configurations. "We've taken the best features from our two existing movable wall products and incorporated them into ADDWALL, a non-generational solution with the flexibility to provide our clients with the form and function that meet their requirements and budget," says Kent Smallwood, General Manager of Inscape's architectural interiors division.

ADDWALL's pressure fit feature allows wall panels to be connected without hardware. It provides space division, accommodates hanging components and can be specified with or without slotted channels. Flexible power and data access allow cables to be routed through the panel interior with standard outlets installed at any height on the panel surface. ADDWALL is a unitized panel, is easy to assemble and delivers the same reliable, efficient relocation and reconfiguration performance that customers have come to expect from Inscape.

ADDWALL is 98% reusable and is free of gypsum board and PVC materials. It is manufactured with eco-friendly materials such as high recycled content steel, fabrics and aluminum which divert waste from landfill. Manufactured under one roof, ADDWALL is a sustainable choice for a "one frame fits all" space division solution. It is manufactured in an award-winning, eco-friendly plant, the first of its kind built on a reclaimed 'brownfield' in the State of New York.

Visit Inscape's showroom during NeoCon, Suite 1095 at the Merchandise Mart to experience ADDWALL and Inscape's award winning and integrated product solutions.
